Plan Changes and Availability

T-Mobile will offer Government Customers the rate plans that are offered to new activations during the course of the agreement. Such rates are made available via the Government Rate Plan list in effect at the time the Government Customer activates a line of service. Because T-Mobile offers new, and generally improved, rate plans on a regular basis, T-Mobile must phase out certain older rate plans. T-Mobile must retain the ability to update and change the Government Rate Plan List available to new activations. Once a plan is discontinued, no new line of service may be activated on that plan, but lines of service already activated on the plan may continue on the plan for the term of the Service Agreement (or for the term of the Service Agreement if the line is not upgraded).

Additional Information

On all T-Mobile plans, during congestion, the small fraction of customers using >50GB/mo. may notice reduced speeds until next bill cycle due to data prioritization. Limited time offer; subject to change. Additional taxes and fees may apply. Not all features available on all devices. Unlimited talk & text features for direct communications between 2 people. Coverage not available in some areas; we are not responsible for our partners' networks. Network Management: Service may be slowed, suspended, terminated, or restricted for misuse, abnormal use, interference with our network or ability to provide quality service to other users, or significant roaming. See T-Mobile.com/OpenInternet for data management details. Not for extended international use; you must reside in the U.S. and primary usage must occur on our network. Device must register on our network before international use. **T-Mobile One General Terms:** Credit approval, deposit, and \$25 SIM starter kit or, in stores & on customer service calls, \$20 upgrade support charge may be required. Capable device required for some features. U.S. roaming and on-network data allotments differ: includes 200MB roaming. T-Mobile ONE not available for hotspots and some other data-first devices. Video streams at up to 1.5Mbps unless you have an HD Day Pass. Optimization may affect speed of video downloads; does not apply to video uploads. For best performance, leave any video streaming applications at their default automatic resolution setting. **Tethering:** Tethering at max 3G. Service may be terminated or restricted for excessive roaming. For the small fraction of customers using >50GB/mo., primary data usage must be on smartphone or tablet. Without AutoPay, \$5 more/line. May not be reflected on 1st bill. **Simple Global:** Usage may be taxed in some countries. Calls from Simple Global countries over Wi-Fi are \$.20/min.
